

At screening each organ system listed below should be assessed and graded on a scale of 0-4 for the degree of impairment (see instructions below). Hodgkin lymphoma illnesses or disease related organ damage should not be assessed in this rating scale. If there are two or more illnesses/impairments in one organ system, the illness/impairment with the highest severity will be evaluated. The sum of all individual organ scores should be calculated. If the total score is more than 6 the patient is not considered eligible for treatment with B-CAP. If one organ system has extremely severe impairment (Grade 4) the patient is not eligible for B-CAP unless this Grade 4 falls in the Eye, Ear, Nose and Throat category. A manual for scoring the cumulative illness rating scale for geriatrics (CIRS-G) is available at:
