1st March 2021

Professor Gorm Greisen
Trial Steering Committee of the Safe Boos C III Trial

Dear Gorm,

The Data Monitoring and Safety Committee have met electronically on 23rd, 26th, 27th February and 1st March 2021 and discussed the outcomes and adverse events reported so far.

Our unanimous conclusions are:

- 1) The trial should continue
- 2) There is no reason to break the blinding
- 3) There is no reason to have another interim analysis by DMSC.

We wish you success with this trial.

Andrew Whitelaw (chair)

Theis Lange

James Boardman
