

SafeBoosC newsletter August 2022

Dear investigators

Welcome to the August 2022 issue of the SafeBoosC newsletter.

SafeBoosC-III follow-up

So far, 27 centers have participants that have reached two years of corrected age, and 22 centers have started completing data entries in OpenClinica. A total of 117 participants have been followed up and 98 families have filled out the parental questionnaire. We suspect that the data completion rate has gone down a bit due to summer holidays. For an overview of data completion, please see figure 1. For an overview of each centre's data completion please see figure 2.

Copenhagen has started the CognitToT assessments and an additional 9 centres across eight countries will participate in the ancillary study. Please let Marie know if your center is interested in participating.

List of participating centres:

NMH Holles St, Ireland	Fondazione IRCCS Milano, Italy
Poznan, Poland	Hospital Universitario 12 de Octubre, Spain
Grand Hopital de Charleroi, Belgium	UZ Leuven, Belgium
University Hospital of Heraklion, Crete, Greece	Cork, Ireland
Szpital Uniwersytecki nr 2 w Bydgoszczy, Poland	Rigshospitalet (Copenhagen University Hospital), Denmark

Figure 1: Overall data completion in the SafeBoosC-III follow up study

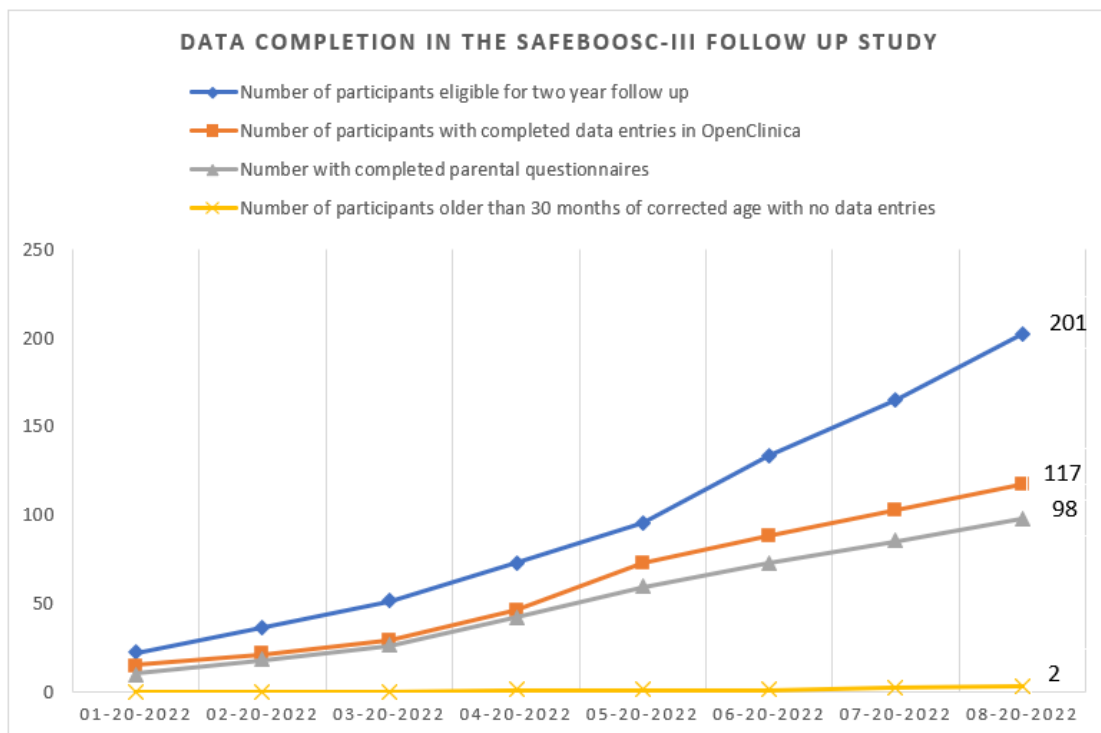

Figure 2: Open centres, number of eligible participants for two year follow up and data completion for each centre up until the 30thst of August 2022. Centres highlighted in green indicate that all three tasks (ethics approval, blinding procedure approval and appointment of blinded assessor) have been completed in order to start the follow up study.

Country	Centre	Participants eligible for two year follow up	Completed data entries in OpenClinica	Completed parental questionnaires
Austria	University Hospital Graz	Nov 2022		
Belgium	UZ Leuven	Oct 2022		
Belgium	Liege Rocourt	Dec 2022		
Belgium	Grand Hospital de Charleroi	Nov 2022
