

SafeBoosC-IIIv Newsletter

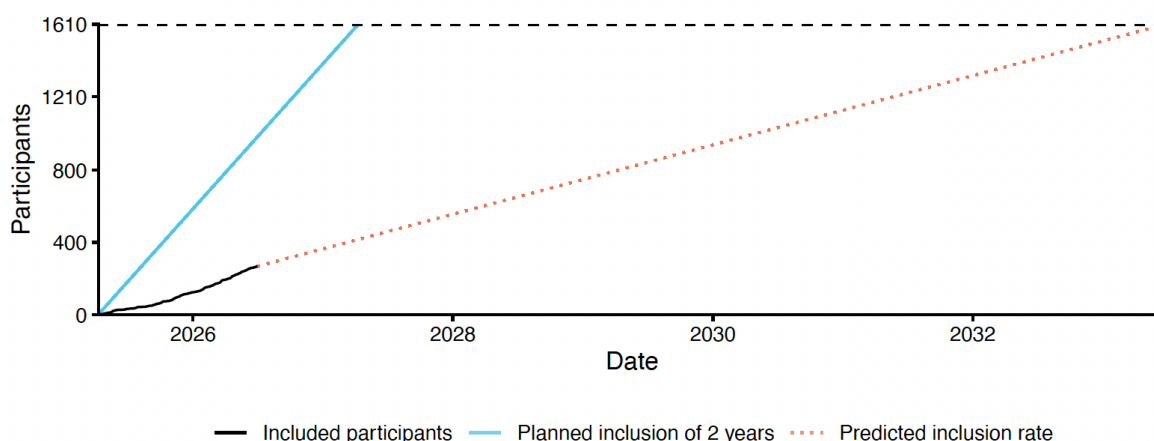

**Randomisations:
268**

Dear Investigators,

This is the SafeBoosC-IIIv newsletter, which we will send out regularly and publish on the website (safeboosc.eu) to keep you continuously updated. We will send the newsletter to all Investigators. Please let us know if you wish to add an email address to the list.

We are pleased to announce that we have currently randomised 268 participants across 19 centres. In June, the first Australian centre, Grace Centre for Newborn Intensive Care in The Children's Hospital at Westmead, Sydney, led by Dr Himanshu Popat began randomisation. We have now opened for randomisation in Spain, Romania, Austria, Greece, the United States, India, Poland, and Australia.

Please see the current rate of inclusion below:

Overview of the enrollment rate.

Investigator Meeting in Copenhagen

We are currently exploring the possibility of hosting a SafeBoosC-IIIv Investigator Meeting in Copenhagen in spring 2027. As a first step, we would like to ask whether you would be interested in attending such a meeting in Copenhagen, Denmark. If you have not responded already, please email caroline.kamp@ctu.dk.

We would be able to cover the costs of your hotel accommodation (one night per person from Europe and two nights per person from other continents), as well as all meals and refreshments during the meeting. Travel costs would need to be covered by your department. We currently have funding to cover expenses for one person per NICU; however, depending on the level of interest, we may be able to extend this to two persons per NICU. Once we have received your responses, we will determine whether it is feasible to hold the meeting.

Central data monitoring

The Executive Steering Committee held its first central data monitoring meeting in June. These meetings will take place every three months to monitor data quality. After each meeting, we will contact some of you to follow up on questions regarding the reported data. This process helps maintain the high standards of data quality and completeness established in previous SafeBoosC trials.

Principal Investigator status

In total, 24 centres have completed all the required preparatory steps and are ready for randomisation. Overall, we are in contact with almost 80 centres from 22 countries. Please see the attached list for the latest progress from all centres and let us know if you have any updates.

Please contact us if you have any questions about the process. We are also available for online meetings to support you in the process.

Best wishes,
Caroline, Johanne, and Janus

Country	Centre	Ethics approval	Signed collaboration agreement	Approved blinding procedure	Local monitoring initiation visit	Delegation log	Randomisations
Argentina	Hospital Universitario Austral, Pilar						
Australia	Grace Centre for Newborn Intensive Care in The Children's Hospital at Westmead						1
Austria	University Hospital Graz, Graz						3
Austria	Department of Pediatrics II, Medical University of Innsbruck, Innsbruck						16
