

SafeBoosC-IIIv Newsletter

Dear all,

We are happy to announce that Principal Investigator Salvador Piris from Hospital Universitario 12 de Octubre in Spain randomised the very first infant in the SafeBoosC-IIIv trial on Friday night!

In total, five centres have now completed all the required preparatory steps and are ready for randomisation. Please see the attached list for the latest progress from all centres, and let us know if you have any updates.

Please do not hesitate to contact us if you have any questions about the process.

Thank you and best wishes,
Caroline, Johanne, and Janus
