

SafeBoosC-IIIv Newsletter

Dear Investigators,

This is the SafeBoosC-IIIv newsletter, which we will send out regularly and publish on the website (safeboosc.eu) to keep you continuously updated. We will send the newsletter to all Principal Investigators and National Coordinators. Please let us know if you wish to add an email address to the list.

We are pleased to announce that we have currently randomised 41 participants. The first Greek centre, Hippokrateion General Hospital of Thessaloniki, led by Principal Investigator Kosmas Sarafidis, has begun randomisation. Two additional centres from Austria and Greece are ready to begin randomisation. We have now opened for randomisation in Spain, Romania, Austria, and Greece.

Protocol paper

The protocol paper has now been approved by the Steering Committee and will be shared with the full author group in mid-August. Principal Investigators from centres that have completed all five preparatory steps will be invited to participate as co-authors. Authors will be added until mid-August.

We believe these criteria provide a reasonable alignment with the Vancouver authorship recommendations. Ultimately, the author list will be decided by the Steering Committee. Please note that authorship on the protocol paper does not ensure authorship on the main outcome paper, and vice versa.

Principal Investigator status

In total, ten centres have completed all the required preparatory steps and are ready for randomisation. Please see the attached list for the latest progress from all centres, and let us know if you have any updates.

Please contact us if you have any questions about the process. We are also available for online meetings to support you in the process.

Substudies

Please see our website for information on the approved [substudies](#). We encourage all NICUs to consider participation in the substudies. We are also happy to assist you if you are considering planning a new substudy.

Please do not hesitate to contact us with any questions or updates from your centre.

Thank you and best wishes,
Caroline, Johanne, and Janus
