

SafeBoosC-IIIv Newsletter

**Randomisations:
25**

Dear Investigators,

This is the SafeBoosC-IIIv newsletter, which we will send out regularly and publish on the website (safeboosc.eu) to keep you continuously updated. We will send the newsletter to all Principal Investigators and National Coordinators. Please let us know if you wish to add an email address to the list.

We are pleased to announce that we have currently randomised 25 participants. The fourth centre, The National Institute for Mother and Child Care Rusescu-Polizu in București, Romania led by Principal Investigator Ramona Mohora has begun randomisation.

Central status

All necessary documents are available on the [website](#). As a reminder, the steps needed before each centre may start randomisation include:

1. Obtain ethics approval in your own country
2. Sign the collaboration agreement
3. Obtain approval of blinding method of primary outcome
4. Complete local monitoring initiation visit
5. Complete delegation log

Please contact us if you have any questions about the process. We are also available for online meetings to support you in the process.

Principal Investigator status

In total, five centres have completed all the required preparatory steps and are ready for randomisation. Please see the attached list for the latest progress from all centres, and let us know if you have any updates.

Substudies

Please see our website for information on the approved [substudies](#). We encourage all NICUs to consider participation in the substudies. We are also happy to assist you if you are considering planning a new substudy.

Please do not hesitate to contact us with any questions or updates from your centre.

Thank you and best wishes,
Caroline, Johanne, and Janus

Country	Centre	Signed collaboration agreement	Approved blinding procedure	Ethics approval	Local monitoring initiation visit	Delegation log	Randomisation started
