How to handle discrepancies: CIP, SOPs & eCRFs

We are aware that some discrepancy between the SOPs, eCRFs and the CIP v.3.3 exist.

When encountering these discrepancies -please follow the latest updated SOPs uploaded by following the link www.safeboosc.eu

When we are further in the process of submitting we will update the CIP/protocol according to the SOPs. This will either be an amendment or a notify, according to the national regulations handled at the discretion of the person delegated the task of submitting.

Reporting any discrepancy encountered to project management: Berit Grevstad at bg@ctu.dk will be appreciated.
