

SafeBoosC-II News

The 2-year follow-up is now approaching.

Some of you have already by now followed up on the first of your patients, for those who have not yet –you will receive a reminder when the baby is about 22 months gestational age.

All infants who are alive at corrected age 23-25 months should be assessed.

According to the SafeBoosC protocol the development of the child must be assessed with the Bayley Scales of Infant and Toddler Development (Bayley-II or III) and a medical examination, and in addition evaluated with an ASQ.

Both Bayley II and III are accepted and for the ASQ second and third edition, but each centre must stick to one version.

If the ASQ or Bayley is not performed -please fill in the eCRF anyway!

SOPs for the 2 year follow up can be downloaded from SafeBoosC.eu

If in doubt please contact Anne Mette.

Publications

We are waiting for the proofs for the British Medical Journal paper. It will be open access and we will send a mail as soon as it is out.

Other manuscripts

1. Joan and Adelina have circulated their draft on the StO₂ effects of the interventions and sensor re-siting.
2. Anne Mette, Cornelia and Manon is about finishing the first draft on the use of cUS/MRI in the RCT with local or central scoring.
3. Anne Mette is working hard on the EEG - data. When they are ready she will go on with the molecular biomarkers and EEG results of the RCT.
4. When the EEG data is ready, Thomas will have a copy for the paper on burden vs molecular biomarkers, EEG, and cUS.
5. Axel has reminded you of the questionnaire for the 'approvals' paper. Please reply ASAP.
6. Petra is ready to start the analysis of StO₂ artefacts.

SafeBoosC-II News

SafeBoosC-III

The first draft of the protocol has now been circulated, please send your comments to Gorm and Maria Skoog by January 11, 2015.

Meeting

The date will be March 2-3 2015.

The place will be Dragør.

By the end of January we will know if the SafeBoosC-III proceeds to stage two in the Horizon2020 application. Depending on this outcome the meeting will be either a joint SafeBoosC-II / SafeBoosC-III meeting or a sole SafeBoosC-II meeting.

**With a wish for a merry Christmas
and a happy new year**

Berit & Gorm
